

Sustainable Sourcing Policy

Siam Global House Public Company Limited and its subsidiaries (“The Company”) has its intention to operate sustainable business based on social and environmental responsibilities. In the Company’s business operations, the sourcing is an important process that supports the business operations; thus, the Company has established the practical guidelines in the same direction to create the sustainability in business operations.

Practice Guidelines

1. Select business partners with strong business potential who operate their businesses in compliance with all applicable laws, rules and regulations.
2. Support the development of potential partners in the sourcing process and sustainable supply chain management to satisfy the changing demand of customers, community and society.
3. Sourcing by focusing on business ethics, non-exploitation to suppliers, providing information accurately, completely, clearly, openly and treats suppliers equally, non-discrimination, as well as listening opinions and recommendations of suppliers.
4. Sourcing suppliers by taking into consideration of environmental impact, social responsibility, and good corporate governance (Environmental, Social, and Governance; ESG), which are a part of sustainable supply chain management,
5. Support the implementation of technology to develop the potential of the sourcing process to achieve efficiency and effectiveness.
6. Monitor sustainability performance of business partners on a regular basis to ensure that they comply with this policy and evaluate sustainability risks that may occur in the value chain system.
7. Focusing on the importance of supplier’s management, building good relationship in long-term business, as well as potential reinforcement for continuous development together.

Mr. Witoon Suriyawanakul

Chief Executive Officer
