

## Sustainable Procurement Policy

Siam Global House Public Company Limited and its subsidiaries (the “Company”) has its intention to operate sustainable business based on social and environmental responsibilities. In the Company’s business operations, the procurement is an important process that supports the business operations; thus, the Company has established the practical guidelines in the same direction to create the sustainability in business operations.

### Practice Guidelines

1. Select business partners with strong business potential who operate their businesses in compliance with all applicable laws, rules and regulations.
2. Support the development of potential partners in the sourcing process and sustainable supply chain management to meet the changing demand of customers, community and society.
3. Procure by focusing on business ethics, non-exploitation to suppliers, providing information accurately, completely, clearly, openly and treat suppliers equally, non-discrimination, as well as listening opinions and recommendations of suppliers.
4. Conduct business with suppliers by taking into consideration of environmental impact, social responsibility, and good corporate governance (Environmental, Social, and Governance; ESG), which are a part of sustainable supply chain management.
5. Support the implementation of technology to develop the potential of the sourcing process to achieve efficiency and effectiveness.
6. Monitor sustainability performance of business partners on a regular basis to ensure that they comply with this policy and evaluate sustainability risks that may occur in the value chain system.
7. Focus on the importance of supplier’s management, building good relationship in long-term business, and potential reinforcement for continuous development together
